

At ARTECH Building by enhancing the employability of our youth is a passion and priority. We serve Corporate India by partnering with them to skill their employees and help them compete globally.

ARTECH is committed to provide quality training for skill repair at an affordable cost. We provide holistic Computer based training and placement services for the youth.

ARTECH is focused on capacity building for the services sector. With the founding team having a strong Technology and Training Services background we have extensively leveraged new media including Internet, Television and E-Learning.

ARTECH courses are for the new economy. Software, Hardware, Networking and Cloud Technology. Our courses have been designed to suit industry requirements and delivered by Reputed Experts with more than Twenty years of Industry Experience.

Our Industry team works out win-win engagements with the Industry to carry out detailed Job Analysis; draw up Job specifications; identify key Competencies for the Job on the one hand and with candidates to bridge the skill gap. This means new thinking about the skills we need, responding to employers' insights and experience and developing programmed tailor-made for their industries. It means higher standards of training delivery, as employers know the levels of performance they need.

Assessments are an integral part of the learning process. However unlike assessments done at school or college which encourage rote learning; assessments at ARTECH are based on building the Key Competencies identified for the job. Adaptive assessments ensure that the student is challenged and encouraged to raise his or her benchmark.

ARTECH represents an exciting evolution in the way we train our workforce. For the first time, employers will take control of the design and delivery of learning in their industry. Curricula in line with the industry; a right balance of theoretical and practical elements throughout the training; modern delivery methods; career counselling and guidance; innovative teaching styles; all these are integral to the ARTECH expertise.

The ARTECH vision

“Create a sustainable industry aligned ecosystem by promoting skill development, benefiting millions in India to get respectable employment opportunities for serving customers and other stakeholders.”

The ARTECH Mission

“Develop over 50000 industry competent workforce by 2022 through establishment of National Occupational Standards, Labour Market Information System, Accreditation of training partners / vocational institutions, Certification of Trainers and facilitation of learner assessments and certifications.”
